### Bank Loan Data Insights Using Tableau (View Project)

This project utilizes SQL Server Management Studio (SSMS) and Tableau to extract and analyze data from bank loans, culminating in an interactive dashboard. The dashboard provides valuable insights into loan performance and trends.

### Food Ordering System using QR Integration

Restaurants often struggle to meet demand for food during peak hours, but staffing remains a challenge. To address this, a cutting-edge solution has been proposed: a revolutionary food ordering system leveraging QR codes. This system allows customers to seamlessly place orders by scanning the QR code on their table, instantly accessing a digital menu.

### CONNECT 4 GAME

The objectives of Connect Four revolve around strategically placing colored discs to create a sequence of four in a row, either horizontally, vertically, or diagonally. The project focuses on blocking the opponent from achieving the same.
